## T. C. Heintzman shares inspirations through her music

Inside every song is a story that inspires a magical moment with sounds, thoughts and / or feelings. Every shared performance allows audiences small and large to partake of the joy and peace evoked through the enhanced keyboard melodies. Though the art and gift of composing is itself a great reward, this artist's inner mission is to continue to share her music with weakened spirits and saddened hearts needing a special TouCH through music.

The sweet and tender surprise continues to be the joy of channeling the sounds, feelings, and, at times, the visions of surroundings and events, that spawn each new instrumental. Many people approach and support the artist with encouragement and appreciation when introduced to the sounds shared.

To date, she has composed 150 instrumentals and there seems to be no end. Her inspirations range from a moment of peace em-

bedded in a sunset to the mirthful sounds of her daughters singing pop songs. The music which flows through this artist's veins carries hope and the belief that the music is nothing if not shared. It must be allowed to reach hearts needing inspiration at a low period in their day or life.

This artist extends a gracious "Thank You" for your interest and faith in her mission. Please share with her any stories that her music evokes in you. Her contact information for business inquiries, ordering music, or simply sharing an experience appears below.

## Featured Song Anecdote: "Spider Dance"

On a blistering day, by a busy, crystal clear swimming pool in lovely Palm Desert, CA, I sat reading a feature in "National Geographic". My husband and I are attached at the elbow and playing footsies. My two over-heated daughters are enjoying the pool and other children. My eyes stray from the text to a man across the pool. He is sitting alone, patting a rolled towel to remove beads of sweat from his balding head to the upturned corners of his mouth. He was watching the children play and smoothly followed the different groups games as if watching a tennis event. His face resonated JOY. His smile formed a PEACEFUL chuckle, almost audible. I said, "It is all strings. Perky bass strings plucking." My husband's reply, "Yes, dear." The first time the new
